PROFESSIONAL SUMMARY: Detail-oriented Data Analyst Fresher with knowledge of Python, MySQL, Power BI, Tableau, and Advanced Excel. Skilled in data cleaning, data visualization, dashboard creation. Strong analytical, problem-solving, and communication skills with a keen interest in learning new technologies and contributing to business growth through data-driven decision-making.

EDUCATION: Bachelor of Technology in Electronics and Communications and Engineering – Rustamji Institute of Technology , Gwalior: May 2022 CGPA: 7.0

TECHNICAL SKILLS: Python - Pandas, NumPy, Matplotlib
SQL/MySQL - Queries, Joins, Triggers, Stored Procedures
Power BI - Interactive Dashboards, Data Visualization, DAX, Power Query
Tableau - Data Visualization, Interactive Dashboards
Advanced Excel - Pivot Tables, VLOOKUP, XLOOKUP, Power Query

PROJECTS:

Product Sales Analysis Dashboard | Power BI – (Jan 2026 – March 2026)

Tools: Power BI , Power Query , DAX , Microsoft Excel

- Developed an interactive Power BI dashboard to analyze product sales performance, revenue, profit, and customer trends.
- Used Power Query for data cleaning and transformation.
- Created data models and DAX measures to calculate KPIs such as Total Sales, Profit Margin, and Top-Selling Products.
- Designed visualizations including bar charts, line charts, maps, and KPI cards for business insights.
- Enabled filtering by product category, region, and time period to support decision-making.
- Improved reporting efficiency by providing real-time and easy-to-understand sales insights.
- Analyzed sales trends across different regions.
- Monitored profit margins and revenue growth.

COVID-19 Data Analysis using SQL – (April 2026 – May 2026)

Tools: MySQL, SQL

- COVID-19 data using SQL to identify trends in cases, recoveries, and death, Used SQL queries with JOIN, GROUP BY, ORDER BY, aggregate functions, and filtering to extract meaningful insights.

- Performed data aggregation and comparative analysis across available countries, regions, and time periods.
- Created analytical queries to calculate totals, averages, growth patterns, and key performance indicators.
- Used SQL-based analysis to support data-driven reporting and decision-making.

Housing Price Analysis & Exploratory Data Analysis using Python – (Feb 2024 – April 2024)

Tools: Python, Pandas, NumPy, Matplotlib, Seaborn

- Performed Exploratory Data Analysis (EDA) on a housing dataset containing 545 records and 13 features.
- Used Pandas and NumPy to load, inspect, clean, and analyze housing data.
- Analyzed relationships between house price, area, bedrooms, bathrooms, stories parking.
- Created data visualizations using Matplotlib and Seaborn to identify trends and patterns in housing data.
- Generated statistical summaries to understand distributions and key characteristics of the dataset.

EXPERIENCE : Fresher

TRAINING:

Data Analyst Training Program – (January 2024 – June 2024)

Training Basket, Sector 62, Noida, Uttar Pradesh

- Completed training in Python, MySQL, Data Analysis, and Data Visualization.
- Worked on data cleaning, reporting, and analytical projects.

Associate Data Analyst Training Program – (January 2026 – June 2026)

Croma Campus Pvt. Ltd., Sector 3, Noida, Uttar Pradesh

- Completed advanced training in Power BI, Advanced Excel, and MySQL.
- Created interactive dashboards, reports, and data-driven insights.
